Employment

- Assistant Professor of Finance. UNIVERSITY OF NORTH CAROLINA AT PEMBROKE 2022–present
- Visiting Assistant Professor of Finance. UNIVERSITY OF WISCONSIN–MILWAUKEE 2020–2022

Education

- Ph.D. in Finance with a minor in Econometrics. UNIVERSITY OF WISCONSIN–MILWAUKEE 2015–2020
Dissertation: [THREE ESSAYS ON MARKET ANOMALIES AND FINANCIAL ECONOMETRICS](#)
Committee: Valeriy Sibilkov (chair). Richard D. Marcus. John R. Huck. Jangsu Yoon. Donghyun Kim
Sheldon B. Lubar Scholarship (2016–2017, 2018–2020)
- M.S. in Finance. SEOUL NATIONAL UNIVERSITY 2013–2015
Thesis: [THE CROSS-SECTION OF CONDITIONAL HETEROSKEDASTICITY AND EXPECTED RETURN](#)
Woongdae Scholarship (2012–2014)
- B.B.A. in Business Administration (Dean’s List). KYUNG HEE UNIVERSITY 2007–2013
Exchange student (Chancellor’s Honor Roll). UNIVERSITY OF MISSISSIPPI (2012)
Military service. Seoul Metropolitan Police Agency (2007–2009)

Research Interests

Empirical asset pricing. International finance. Behavioral finance. Financial econometrics

Publication

- [ZOOM IN ON MOMENTUM](#) 2024
International Review of Financial Analysis 94, 103217
- [INFORMED TRADING OF OUT-OF-THE-MONEY OPTIONS AND MARKET EFFICIENCY](#) 2022
with Chang-Mo Kang, Donghyun Kim, and Geul Lee *Journal of Financial Research* 45 (2), 247–279
2018: University of Wisconsin–Milwaukee; 2016: OptionMetrics Research Conference. Financial Research Network Annual Conference. Australasian Finance and Banking Conference. Annual Conference on Asia-Pacific Financial Markets

Working Papers

- GLOBAL FLIGHT-TO-QUALITY AND ASSET PRICING: EVIDENCE FROM FACTOR RETURNS 2025
with Chang-Mo Kang and Donghyun Kim Will be presented at Academy of Finance Annual Meeting
2024: Korean Securities Association Annual Meeting; 2023: Seoul National University. Business Faculty Research Alliance. Korean Securities Association Summer Finance Roundtable. Annual Conference of Asia-Pacific Association of Derivatives. Midwest Finance Association Annual Meeting. University of Seoul; 2022: Yonsei University. Sungkyunkwan University.

Utah Valley University; 2021: Chung-Ang University; 2020: Financial Management Association Annual Meeting, Annual Conference on Asia-Pacific Financial Markets. Korea Advanced Institute of Science and Technology. Seoul National University; 2019: University of Wisconsin–Milwaukee

- Global flight-to-quality (FTQ) events lead to underperformance of distressed stocks which subsequently outpace the market in recovery periods. The drastic return changes of distressed stocks, concurrently observed across borders, create internationally synchronized abnormal returns of prevailing factors. By analyzing 153 factors of 13 themes in 23 developed countries, we find that the global FTQ events enhance the global quality factor’s positive correlations with five themes of local factors (low risk, momentum, profit growth, profitability, and quality) and negative correlations with two themes (size and value). The changes in global quality factor exposures of local factors are orthogonal to the changes in market factor exposures. Further, the swing of global quality factor returns amplifies volatility of the seven themes of local factors across borders. Our results provide novel implications for global equity investment and asset pricing.

- **CROSS-SECTIONAL FACTOR MOMENTUM: EVIDENCE FROM MULTIPLE FORMATION PERIODS** 2025
with Donghyun Kim Revise-and-resubmit at *Applied Economics Letters*

- We revisit cross-sectional factor momentum by exploring a range of formation periods. Recent- and intermediate-past horizons capture distinct aspects of factor momentum, with neither spanning the other in double-sort analyses. Subsample analyses support the persistence of the recent-past factor momentum premium post-publication, suggesting it is unlikely driven by data mining, while the intermediate-past factor momentum premium varies with the publication and significance of factors.

- **THE WORLD PRICES OF INCOME AND INEQUALITY RISKS** 2025
Under review at *Journal of Behavioral and Experimental Finance*
2024: University of North Carolina at Pembroke

- Income and inequality risk premia are estimated in the US, North America, Europe, Japan, and Asia Pacific excluding Japan, respectively. As prior literature predicts, the income and inequality factors explain the cross-sectional returns of size/book-to-market and size/momentum portfolios, and the income risk carries positive premia in all five regions. In contrast to its prediction, however, the inequality risk conveys negative premia in the US, North America, and Europe and delivers positive premia in Japan and Asia Pacific excluding Japan. The results suggest that inequality as well as income risk is a significant macro-finance pricing factor and plays distinct roles in different regions.

Works in Progress

- **REVISITING BAD BETA GOOD BETA** 2025
2020: University of Wisconsin–Milwaukee
– I revisit Campbell and Vuolteenaho’s (2004) Bad Beta Good Beta intertemporal capital asset pricing model (ICAPM) by replicating the original results, extending them with the latest data, changing the test assets, and altering the tests. From July 1963 to December 2001, the ICAPM outperforms the capital asset pricing model (CAPM) in explaining the size and book-to-market portfolios but does not in explaining other test assets. From January 2002 to August 2022, the ICAPM no longer outperforms the CAPM even in explaining the size and book-to-market portfolios.
- **HOW DOES VOLATILITY MANAGEMENT IMPROVE ANOMALIES?**
with Chang-Mo Kang and Donghyun Kim
- [WHICH VOLATILITY DRIVES THE ANOMALY? CASH FLOW VERSUS DISCOUNT RATE](#)
- [MULTIWAY CLUSTERED STANDARD ERRORS IN FINITE SAMPLES](#)

Service

Professional

- Discussant: Academy of Finance Annual Meeting (2025), Financial Management Association Annual Meeting (2023), Annual Conference of Korea Money & Finance Association (2023)
- Referee: *Finance Research Letters* (2021)

University of North Carolina at Pembroke

- Organizer: SAS Programming Workshop (2024–2025)
- Member: Academic Information Technology Committee (2023–2024)

Teaching Experience

University of North Carolina at Pembroke

- Business Finance (number of sections = 14, mean of evaluations = 4.47/5.00) 2022–present
- Investment Analysis and Portfolio Management (4, 4.57/5.00) 2023–present
- Behavioral Finance (4, 4.26/5.00) 2023–present
- Managerial Finance (1, 4.31/5.00) 2024–present
- Money, Financial Markets, and Institutions (3, 4.00/5.00) 2022–2024

University of Wisconsin–Milwaukee

- Financial Modeling (number of sections = 10, mean of evaluations = 4.69/5.00) 2019–2022
Gold Star Teaching Award (2020). Outstanding Doctorial Student Teaching Award (2020)
- Investment Finance (4, 3.94/5.00) 2020–2022
- International Financial Management (9, 4.27/5.00) 2017–2021
- Intermediate Finance (4, 4.68/5.00) 2019–2020
Outstanding Doctorial Student Teaching Award (finalist, 2019)
- Principles of Finance (teaching assistant, 2, 4.50/5.00) 2016–2017

Skills

C. Git. L^AT_EX. Python. R. SAS. Slurm. Stata
